Subject:

Li, Ruixiang Wednesday, March 19, 2003 10:56 AM STIC-Biotech/ChemLib Sequence search of Application NO: 09/727,739

Please do a standard search on:

(i) SEQ ID NOS: 15 and 18 against the interference amino acid databases;

(ii) SEQ ID NOS: 17 and 19 against both commercial and interference amino acid databases.

Thank you very much!

Implications for 1soform-selective inhibitor design derived from the
binding mode of bulky isothioureas to the heme domain of endothelial
J. Biol. Chem. 276.26486-26491(2001)
II. FUNCTION: PRODOCES MITRIC OXIDE (NO) WHICH IS IMPLICATED IN
VASCULAR SMOOTH MUSCLE RELAXATION THROUGH A CGMP-MEDIATED SIGNAL
FRANSDUCTION PATHWAY. NO MEDIATES VASCULAR ENDOTHELIAL GROWTH
FRACTOR (VEGF)-INDUCED ANGIOGENERIS IN CORONARY VESSELS AND
PROMOTES BLOOD CLOTTING THROUGH THE ACTIVATION OF FLATELETS.
II. CATALITY: L.axginine + N NADPH + M O(2) = citrulline +
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               MEDLINE-20503854; PubMed-11051558;

Sometostatin precursor - chicken
C; Species: Gallus gallus (chicken)
C; Species: Gallus gallus (chicken)
C; Accession: 320630
R; Nata, K; Kobayashi, T; Karahashi, K; Kato, S; Yamamoto, H; Yonekura, H; Oka submitted to the EMBL Data Library, June 1991
A; Description: Nucleoctide sequence determination of chicken somatostatin precursor A; Reference number: $20630
A; Accession: $20630
A; Accession: $20630
A; Status: preliminary
A; Molecule type: mRNA
A; Residues: 1-116 < NAT>
A; Cross references: EMBL:X60191; NID:962985; PIDN:CAA42747.1; PID:962986
C; Superfamily: somatostatin
                                                                                                                                                                                                                                                                                                                                                                                                                       Sometostatin II precursor - rainbow trout
C.Species: 0ncorhynchus mykiss (rainbow trout)
C.Species: 0ncorhynchus mykiss (rainbow trout)
C.Accession: 151064
R.Moore, C.A.; Kittilson, J.D.; Dahl, S.K.; Sheridan, M.A.
Gen. Comp. Endocrinol. 98, 253-261, 1995
A.Fitle: Isolation and characterization of a cDNA encoding for preprosomatostatin c
A.Feference number: 151064; MUID:95354921; PMID:7628684

No is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
